

PRODUCT INFO BIBER 22 BRUSH

BIBER 22 BRUSH – THE SPECIALIST FOR WALL CLEANING

The electrically operated BIBER 22 BRUSH is the ideal device for efficient cleaning of vertical pond and pool walls.

The brush sucks itself to the surface by rotation and can be moved easily and effortlessly by means of the telescopic rod, which can be extended up to 5 m. The loosened dirt can be sucked off simultaneously with a pond suction cleaner via an attached suction hose. This means that the system works without clouding. The direction of rotation of the brush attachment can also be controlled via the switch unit.

The extensive range of optional accessories offers various, easily exchangeable brush attachments for different types of surfaces and levels of pollution. In addition, the brush is available in different variants.

- Efficient and easy cleaning
- Turbidity-free working
- Switch unit controls the direction of rotation of the brush attachment
- We recommend the Clear-Pad and Clear-Pad-Pro cleaning attachments
