

PRODUCT INFO CLEAR-PAD VARIANTS

CLEAR-PAD, CLEAR-PAD-PRO AND CLEAR-DRUM FOR IDEAL CLEANING RESULTS

Numerous users of the pond cleaning brushes BIBER 22 BRUSH and BISAM 44 BRUSH now rely on the various Clear-Pad versions, which give them an even better cleaning effect than conventional brush attachments. The unique material is gentle on films when in constant contact with water, yet strong enough to remove even tougher dirt from surfaces. Even small recesses and joints are easily cleaned. With the Clear-Pad-Pro, where the brush fabric extends beyond the edge of the pad holder, not only surfaces but also edges can be cleaned right into the corners and angles. The material can also be used on wooden decks and terraces. Only water and no chemicals are needed to renew the surface gently and effectively.

The pad attachments on the Clear-Drum for the BISAM 44 BRUSH as well as on the Clear-Pad and Clear-Pad-Pro for the BIBER 22 BRUSH are attached to the roller brush or pad holder by means of Velcro. If necessary, they can be easily and quickly exchanged and replaced with replacement pads.

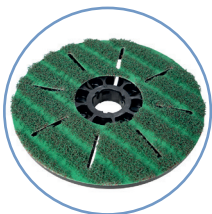

- Better cleaning effect than conventional brush attachments with bristles
- Flexible use for cleaning joints, cracks and foil surfaces or even wooden decks
- Removes even tough dirt without problems

THE DIFFERENT COLOUR VARIANTS

The Clear-Pad, the Clear-Pad-Pro and the Clear-Drum are each available in a green and a grey version. The two colour versions differ in their hardness. The green versions are ideal for light to normal dirt build-up on films. For more stubborn dirt on various foils or even harder materials, we recommend the grey versions. The surfaces to be cleaned are always protected as long as there is contact with water, while the dirt is effectively gripped.

Clear-Pad green

Item No. BB1005

Clear-Pad-Pro green

Item No. BB1010

Clear-Drum green

Item No. BISAM1016

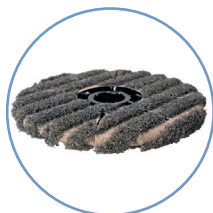

Clear-Pad grey

Item No. BB1023
